

List of medical conditions treated with stem cells

Acute leukaemias

- ✓ acute lymphoblastic leukaemia (ALL)
- acute myeloid leukaemia (AML)
- ✓ acute biphenotipic leukaemia
- ✓ poorly differentiated acute leukaemia

Chronic leukaemias

- chronic myeloid leukaemia (CML)
- chronic lymphocytic leukaemia (CLL)
- juvenile chronic myeloid leukaemia (JCML)
- ✓ juvenile myelomonocytic leukaemia (Naegeleg leukaemia) (JMML)

Myelodisplastic syndrome

- ✓ refractory anaemia (RA)
- ✓ refractory anaemia with ringed sideroblasts (RARS)
- ✓ refractory anaemia with excess blasts (RAEB)
- ✓ refractory anaemia with excess blasts in transformation (RAEB-T)
- ✓ chronic myelomonocytic leukaemia (CMML)

Diseases caused by stem cell defect

- aplastic anaemia(severe)
- Fanconi anaemia
- paroxysmal nocturnal haemoglobinuria

Myeloproliferative syndromes

- acute myelofibrosis
- myelofibrosis
- polycythaemia vera
- Essentials thromb ocythemia
- Agnogenic myeloid metaplasia

Hyperplastic disorders of lymphatic system

- ✓ non-Hodgkin lymphoma
- ✓ acute lymphogranuloma
- ✓ prolimphocytic leukaemia

Phagocytic disorders

- Chediak-Higashi syndrome
- chronic granulomatous disease (CGD)
- ✓ neutrophil actin dysfunction
- reticular dysgenesis

Disorders caused by the absence or malfunctioning of enzymes

- ✓ mucopolysaccharidoses (MPS)
- Scheie syndrome (MPS-IS)
- Hunter syndrome(MPS-II)
- Sanfilippo syndrome (MPS-III)
- ✓ Morquio syndrome (MPS-IV)
- ✓ Maroteaux-Lamy syndrome (MPS-VI)
- ✓ Sly syndrome, beta- glucoronidase deficiency (MPS-VII)
- adrenoleukodystrophy
- ✓ mucopolysaccharidosis
- ✓ mucolipidosis II
- Krabbe disease
- ✓ Gaucher disease
- Niemann-Pick disease
- ✓ Wolman disease
- ✓ metachromatic leukodystrophy

Histiocytic disorders

- ✓ familial erythrophagocytic lymphohistiocytosis
- histiocytosis -X
- ✓ hemophagocytosis

Inherited red blood cell abnormalities

- ✓ beta thalassemia
- pure red cell aplasia
- ✓ sickle cell anaemia

Other inherited conditions

- Lesch-Nyhan syndrome
- ✓ cartilage-hair hypoplasia
- ✓ Glanzmann's thrombasthenia
- ✓ osteopetrosis (marble bone disease)

telangiectasia Kostmann syndrome leukocyte adhesion deficiency DiGeorge syndrome bare lymphocyte syndrome Omenn syndrome Inherited immune ✓ severe combined immunodeficiency (SCID) system disorders SCID adenosine deaminase deficiency SCID T and B lymphocytes negative SCID T lymphocytes negative and B lymphocytes positive common variable immunodeficiency Wiskotta Aldrich syndrome X-linked lymphoproliferative disorder Hereditary thrombotic mega-karyocytosis (inherited thrombocythemia) disorders multiple myeloma Plasma cell disorders plasmocythic leukaemia ✓ Waldenström's macroglobulinemia breast cancer Ewing's sarcoma Other forms of cancer neuroblastoma (sympathicoblastoma) kidney cancer ✓ beta thalassemia Inherited red blood cell pure red cell aplasia abnormalities sickle cell anaemia

Inherited immune system disorders	 ✓ telangiectasia ✓ Kostmann syndrome ✓ leukocyte adhesion deficiency ✓ DiGeorge syndrome ✓ bare lymphocyte syndrome ✓ Omenn syndrome ✓ severe combined immunodeficiency (SCID) ✓ SCID adenosine deaminase deficiency ✓ SCID T and B lymphocytes negative ✓ SCID T lymphocytes negative and B lymphocytes positive ✓ common variable immunodeficiency ✓ Wiskotta Aldrich syndrome
	✓ Wiskotta Aldrich syndrome✓ X-linked lymphoproliferative disorder

Histiocytic disorders

- ✓ familial erythrophagocytic lymphohistiocytosis
- ✓ histiocytosis -X
- hemophagocytosis

Administration of stem cells brings benefits to patients with neurological disorders such as: autism and cerebral palsy
